## DETAILED ACTION

1. The amendment filed on August 8, 2005 has been entered.

### *Drawings*

2. The drawings were received on August 8, 2005. These drawings are acceptable.

### ***Claim Rejections - 35 USC § 112, 1<sup>st</sup> paragraph***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1, 3, 5-8, 10 and 12-14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The original disclosure does not provide support for the pin moving out of contact and back into contact with the lifting shoe as now set forth in the last paragraph of each of claims 1 and 8. Rather, support is provided for contact being maintained between the pin 208 and the lifting shoe 206 as described in paragraphs 0022 and 0025 (e.g., lines 5-7) and as shown in Figures 5-6.

***Claim Rejections - 35 USC § 112, 2<sup>nd</sup> paragraph***

5. Claims 1, 3, 5-8, 10 and 12-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 13, the recitation "tension crank being received within the upper arm" remains vague and indefinite since the invention is being positively defined in terms of the upper arm which is not part of the claimed invention, and it is suggested to insert --configured for-- before "being" or the like.

In claim 7, lines 1-3 are vague and indefinite as to what is being set forth, particularly as to what "amount of tension" pertains, and as to how the tension crank size increases, and it is suggested to change lines 1-3 to read:

-- wherein an amount of tension applied to the band saw during a specific amount of rotation of the tension handle increases as the size of the selected tension crank [[size]] increases.--

In claim 8, lines 7-8, the relationship between the lifting shoe and the upper arm, and it is suggested in lines 7-8 to delete "configured for being" in line 8 to delete "further" or the like.

In claim 14, lines 1-2 are vague and indefinite as to what is being set forth, particularly as to what "amount of tension" pertains, and as to how the tension crank size increases, and it is suggested to change lines 1-2 in the manner described above for claim 7.

***Claimed Subject Matter***

6. Claims 1, 3, 5-8, 10 and 12-14 are considered to read over the prior art of record because the prior art or record does not teach or suggest the claimed combination of features including a pin that moves out of contact and into contact with a lifting shoe as claimed. However, these claims **cannot** be considered to be "allowable" at this time due to the rejection(s) under 35 U.S.C. 112, 1<sup>st</sup> paragraph set forth in this Office action. Therefore, upon the claims being rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112 set forth in this Office action, further consideration of these claims with respect to the prior art will be necessary.

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
